Kipu Quantum - Iskay Quantum Optimizer ✕   Q-CTRL - Optimization Solver ✕   Multiverse Computing - Singularity Machine Learning ✕   +

User Acceptance Terms

By submitting this form, you agree to only use the Qiskit Functions free trial licenses for the purpose and duration of the NEDO challenge.

By submitting this form, you also agree that IBM may use the information provided in this form to enable access to Qiskit Functions for the duration of the NEDO Challenge.

IBM will process any personal information submitted in this form according to IBM's Privacy Statement.

IBM may share the personal information collected on this form with IBM Subsidiaries and Qiskit Function vendors. The identity of your organization, any feedback you provide regarding the use of any functions, and usage metrics for functions you elect to use will be provided by IBM to Qiskit Functions providers to notify them of your interest in their Qiskit Function and to improve their products and services.

Please be advised, Functions provided by Qiskit Function vendors for use in the NEDO Challenge may be provided at a beta or preview level and may not be suitable for the intended use or purpose.

You may withdraw consent at any time by notifying the IBM Quantum Startups team at: quantum.startups@ibm.com. Please be advised that this will not affect the lawfulness of our use of your personal information prior to your consent withdrawal.
